Environmental protection, sustainable development and natural resources exploitation

Protection of refugee,

What we do?

Urban Spaces is an MSF initiative implemented in 6 cities all over the world, where several civil society and refugee and migrants' organizations are cooperating in order to support and express their solidarity towards migrants and refugees. In all 6 cities awareness raising and training activities take place.

School visits are an integral part of this effort and aim at informing students for the refugee and migration phenomena in Greece and all over the world.
